## EDGE // BORDO

**RECTIFIED**  
RETTIFICATO

**NATURAL SURFACE**

The natural finish captures the original essence of the material and underlines its aesthetic qualities, such as colouring, veins and textures. Resistant and versatile, the natural surface finish is recommended for use on floors and walls in residential, commercial and public high traffic areas.

**SUPERFICIE NATURALE**

La finitura naturale permette di cogliere l'originale essenza materica del prodotto esaltandone le qualità estetiche, incluse le colorazioni e le eventuali venature e texture. Resistente e versatile, questa superficie è indicata per la posa a pavimento e a parete negli spazi residenziali, commerciali e pubblici ad alto traffico.

**BRUSHED SURFACE**

Brushing is a special way of working the ceramic surface to produce a slight but continuous glossy effect which evenly underlines the material's structure. Brushed surfaces evoke the attraction of lived-in materials and underline the product's aesthetic features, the depth of colour and the realism of details in various different graphic designs. Used to cover floors and walls, brushed materials are particularly recommended for use in residential spaces, but can also set off the design of commercial and public spaces with medium traffic intensity.

**SUPERFICIE MOLATA**

La molatura è una particolare lavorazione della superficie ceramica in grado di produrre un leggero ma continuo effetto lucido che asseconda in maniera uniforme la struttura del materiale. Le superfici molate evocano il fascino della materia vissuta ed esaltano l'estetica del prodotto, la profondità dei colori e il realismo dei dettagli delle diverse grafiche. Impiegati nel rivestimento di pavimenti e pareti, i prodotti molati sono particolarmente indicati negli spazi residenziali, ma possono arricchire anche il design degli spazi commerciali e pubblici a traffico medio.

**GRIP SURFACE**

The Grip surface offers the perfect combination of beauty, dependability and safety for outdoor pavements, public and commercial spaces, and pathways on private land specifically requiring high resistance to temperature excursions, frost, damp and fire. This type of surface can withstand considerable static and dynamic loads. It has a high friction coefficient and a non-slip surface. It offers a high degree of resistance to stains, solvents, cleaning products, acids and salt. It is unaffected by moss or mould. Easy cleaning. Fincibec ISO 13006 Bla porcelain stoneware with a high level of vitrification is unalterable over time and offers the best possible response to all requirements, while guaranteeing visual continuity between indoors and outdoors in the case of product lines available with multiple surface finishes.

**SUPERFICIE GRIP**

La superficie Grip è il giusto connubio tra estetica, affidabilità e sicurezza ed è idonea per la realizzazione di pavimentazioni delle aree esterne, degli spazi pubblici, commerciali e dei passaggi delle aree private dove sono richiesti requisiti specifici. Alta resistenza agli sbalzi termici, al gelo, all'umidità e al fuoco. Idoneità a sopportare notevoli carichi statici e dinamici. Elevato coefficiente di attrito e sicurezza alla scivolosità. Forte resistenza alle macchie, ai solventi, ai detergenti, agli acidi, al sale. Inattaccabilità da muffe e muschi. Facile pulibilità. Il gres porcellanato Fincibec ISO 13006 Bla, ad elevata greificazione ed inalterabile nel tempo, risponde nel modo migliore a tutte queste necessità garantendo inoltre per le serie con più finiture superficiali continuità visiva tra gli ambienti interni ed esterni.
